My dad used to play on such games and even looked for them nowadays. We would have my mother run by the rooms to see what goodies they had to offer, even if it meant stumbling over a foot. I'd love to get this, I've always wanted to be able to play my old Amiga games on a modern pc. One of the main things that keep me on the Amiga is the music scene, which I hear is pretty active on the Amiga right now. I'd like to be able to have my old Amiga music on my PC to

recreate some of my memories. Thanks for the interest but unfortunately it is only available as an XC64 package. By the looks of the forum it could be converted to an.iso._____Circles and Squares Hearthstone, Dark Souls, SID, NetHack and some other stuff I'm new to the whole videogame scene. I was looking for a small portable game that could run on it's own without the need of a computer. Fuse Portable works very well with that. I'll download it and it can't get any better. Hi guys, there are some bugs in the WinXC64 released version. As explained in

the archives, the binaries aren't signed so they can't be installed automatically. Either install them manually, or unpack them and manually edit the installer (or use Magic ISO). The tutorial is well written and should run on any system that supports.net. The only issue that it had for me is that the extractor recognised the game's name as "Doom 3", which I didn't have at that point. Hi guys, there are some bugs in the WinXC64 released version. I've tried the.NET installer before (after installing the free.net framework) and it actually extracted the files. Not sure what your issue is, but I can confirm the extraction worked on my end._____C b7e8fdf5c8
