From KB3141163 - Windows Update Client 10: There is a potential issue with Windows Update and Windows Defender that may cause local updates to fail for computers running Windows 10. This is currently only a problem for computers using the Windows-10-No-Phone-10-Thru-WSL.iso ISO image. Workaround: If you are running Windows 10 in ThruWSL mode, do not use Windows 10 via the Update Manager. Connect your Windows 10 in ThruWSL by using the Hyper-V window in

Windows 8.1 or Windows 10. After opening Hyper-V, install the latest updates on Hyper-V. The updates may install automatically or you may need to restart your computer. When you return to Windows 10 via the Windows Store, run the WindowsUpdate command in the Command Prompt. (type "C:\Windows\system32\windowsupdate.exe" /update mode /noreboot)." Since you are using a Windows 10 ISO, installing updates automatically with Windows Update is not an option. Windows 10 (build version 1607)Â c6a93da74d
