It supports the entire Adobe Acrobat range. More importantly, it is simple to use: several powerful features are built in. It integrates smoothly with the application's standard editor, and documents can be published easily with just one click. It's also very fast and energy-efficient. Unlike Adobe's Acrobat, it works with nearly all existing documents without any changes to the underlying documents. It has the unique 'kiss' option, which makes it very easy to extract and send any kind of content that is saved in PDF documents. Chew7 is available in the Mac App Store. This version comes with a bug fix and a set of improvements in the recent build. 5ec8ef588b
